CORNER PROFILE**

50MM X 50MM FLEXI ANGLE  
FOR INTERNAL AND EXTERNAL  
CORNERS NOT AT RIGHT ANGLES.

CAN ALSO BE USED FOR  
WINDOW REVEALS.

**FLEXI ANGLE**

Document Number: HYG004

## Notes

35mm Hygienic Partition creates a robust, food safe temporary or permanent dividing wall. The modular extruded PVC panels click together to form a robust and stable floor-to-ceiling partition. There are no supports on either side.

Both faces of the panel of the panel are hygienic, food safe and easy to clean. This makes it ideal for use in food manufacturing plants, cafes, food counters, restaurants, airports, shopping centres and offices.

35mm Hygienic Partition is also ideal for premises designed for animals including dog kennels, catteries, piggeries, falconries, pigeon lofts, hen coops and milking parlours on farms.

The PVC panels are made from recycled PVC and are 100% recyclable after many years of use. They create a neat, pristine and professional finish and require no maintenance apart from cleaning with water and detergents. Jet washer cleaning will not harm the panels.
